EDUCATION

University of the East - Caloocan City

Bachelor of Science in Computer Engineering
Senior High School - ICT Graduate

Caloocan City, NCR

Graduation Date: Jun 2027
Graduation Date: July 2023

CERTIFICATIONS & TRAININGS

- Cisco Certified Network Associate August, 2026
- CompTIA Security+ January, 2026
- ISC2 Certified in Cybersecurity November, 2025
- Aviatrix Multicloud Network Associate December, 2025
- Google Cybersecurity Professional November, 2025
- Cisco NetAcad - CyberOps Associate Coursework May, 2026
- Cisco NetAcad - ENSA, ITN, SRWE June, 2026

EXPERIENCE

RivanCyber Training Institute Inc.

Cybersecurity Intern

Makati City

May 2026 - July 2026

- **Optimized enterprise network simulations** within VMware environments by configuring robust network topologies, managing both virtual and physical Cisco Switches, Routers, DNS, and DHCP services via SecureCRT.
- **Enhanced automated local threat detection** and log analysis by deploying an AI-Enrichment Logs SOC Laboratory baseline architecture for training environments.
- **Boosted student lab success rates** by guiding 20+ students through the troubleshooting of complex network topologies, security configurations, and technical errors. .

TECHNICAL PROJECTS

AI-Assisted SOC Laboratory (Homelab)

- **Engineered an enterprise SOC laboratory** using VMware to orchestrate a Fortinet firewall, a Wazuh manager with Suricata IDS, and 2-3 endpoint agents.
- **Integrated an offline AI pipeline** via Filebeat and ELK, leveraging a localized **TinyLLaMa** instance to automatically enrich security logs with MITRE ATT&CK mappings.

LEADERSHIP EXPERIENCE

Computer Engineering Students' Society UE Caloocan

Public Relations Officer

- Promoted workshops, seminars, and technical programs to increase engagement within the community. Served as Student Speaker for "From Student to Security: Leveling up your Cybersecurity Career," teaching cybersecurity fundamentals, toolsets, and mindsets to peers

TECHNICAL SKILLS

Computer Networking: Cisco IOS CLI (Routing & Switching), VLSM/Subnetting, Packet Analysis (Wireshark), IPAM

Cybersecurity: Threat Detection (Wazuh, Suricata, Fortinet), SOC Operations, ACL, Security Standards,

Programming: Python, Java, HTML, CSS, REST API, JSON

Systems & Tools: Linux Administration (Rocky Linux, Kali), VMWare Workstation, GNS3, SecureCRT, EVE-NG
